

# Underground Connection

## ● Summer events

The Kansas Institute of Underground Technology recently worked with training needs of Oxy USA Inc. in Liberal, Kansas. Locator class was held in the office of Oxy USA and ended working with the locator receiver/transmitter in their

field west of Liberal. Each participant had an opportunity to track lines running from and to a gas well pump.

## LIKE US ON FACEBOOK

Kansas Institute of Underground Technology goes online with facebook. Check us out at facebook/undergroundtech for some of the latest in training at our campus in Beloit, Kansas.

## ACTIVITIES: Summer class in Beloit trains two from Indiana.

## Summer class in Hays trains one from New York

and one from Hays.

## SCHOOL IS BACK IN SESSION

Students came to campus this fall greeted by the new message and logo.

*Hands-On Skills. High-Tech Careers.*

Classes are making today for the

September 16-21 Horizontal Directional Drilling

October 15 – 19 Horizontal Directional Drilling

The Kansas Institute of Underground Technology evolved from the increasing need of a trained workforce in the career fields of horizontal direction drilling and training for locating underground utilities. North Central Kansas Technical College is a leader in the delivery of technical education within the State of Kansas.

In conjunction with grant assistance from the Kansas Department of Commerce and support from Charles Machine Works/Ditch Witch, Inc., has developed the Kansas Institute of Underground Technology. The Institute that is commonly referred to as U-Tech, features a state-of-the-art up-to-date curriculum, along with hands-on practical training opportunities to allow participants/students the opportunity to successfully complete the training needed to safely operate equipment used in underground technology. North Central Kansas Technical College, invites you to scroll through our web site or give us a call to learn more about training opportunities.
