

Underground Connection

Volume 3 -1

Underground Technology is an invocative way of offering training to prospective employees of the underground world. Training will include safety with underground damage prevention technologies in locating pipe and wire facilities and verifying public utility locates before you dig...Class is held on the campus of North Central Kansas Technical College, Beloit and Hays, KS.

SAFETY TOPICS:

1. Call 811
2. Verify locates with 950 receiver.
3. Check depths.
4. Expose all utilities in the drill path and along the path with the use of vac.
5. Drill through the pothole with utility exposed.

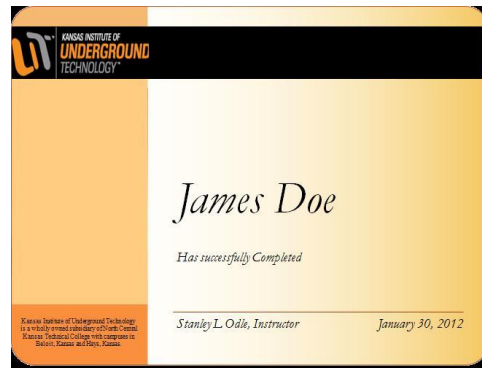

ACTIVITIES:

Don Thomas, Underground Tech trainer was on hand to present proper techniques while operating directional drill to team from Gardner.

NEW FX20 Ditch Witch® Vacuum purchased by Kansas Institute of Underground Technology.
